

# Release Notes

Release date: 11.12.25

Version: 24.10.0

### 126326 - Default Branding Settings

#### Overview:

Administrators can now set one branding template as the default, ensuring consistent branding for Companies, Sites, and users without an assigned template.

#### Benefits:

Eliminates inconsistent branding across the organisation and simplifies setup for new entities.

#### Configuration:

- Navigate to Administration → Company → Settings → Branding Settings → Add/Edit Branding Template.
- Use the new “Set as default template” dropdown (Yes/No).
- Default template is automatically applied during Company/Site creation.
- Administrators and HR users can still select a different template if they prefer.

The image contains two screenshots of the HRwize web application interface. The top screenshot shows the 'Branding Settings' page. On the left is a sidebar menu with options: 'Back To Top Of Page', 'Images', 'Colours', 'Analytics Colours', 'Twitter Integration & RSS', and 'Feed'. The main content area has a 'Template name' input field and a 'Set as default template' dropdown menu which is currently set to 'Yes'. The bottom screenshot shows two dropdown menus. The first is 'Timesheet template' with the text 'Please choose'. The second is 'Branding template' with the text 'Default' selected. Both dropdown menus are highlighted with a yellow border.

**Screenshot:** Showing new branding setting and a default branding template

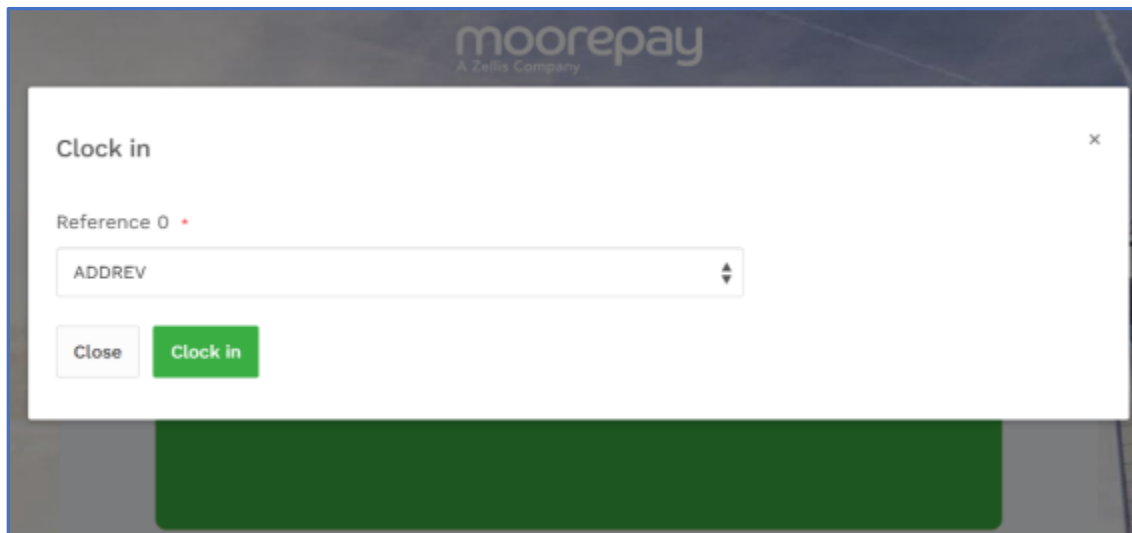

## 136691 – QR Code Clock-In Enhancements

### Overview:

Reference 0 (Pay Code) is now mandatory when clocking in via QR code in All-in-One environments.

### Benefits:

- Ensures successful Payroll sync for time tracking records.
- Reduces Payroll data errors.

**Screenshot:** Showing the user being prompted for a mandatory reference 0 when Clocking in using a QR Code

## 138179 - API Enhancement: Download Candidate CV

### Overview:

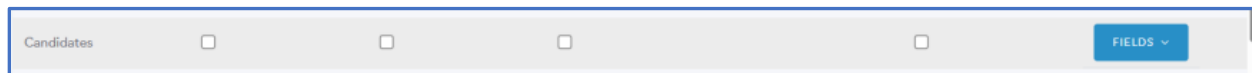

The “Get a Candidate” API now supports downloading candidate CVs.

### Benefits:

Streamlines recruitment workflows by enabling CV retrieval via API.

### Configuration:

- Navigate to Administration → Company Settings → API Settings → Candidates.
- Enable the new “Download” checkbox.
- Use the new API route : GET /api/v1/candidate/{candidate\_id}/cv/download

**Screenshot:** Showing 'Download' option in API Settings

## 138221 - Employee Suggestions: Anonymous vs Public Notifications

### Overview:

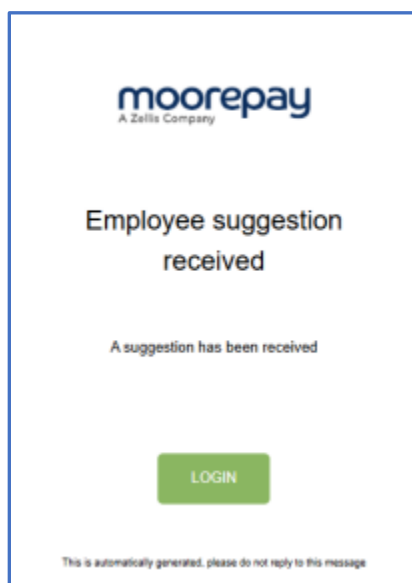

Email notifications now respect anonymity settings for employee suggestions.

### Benefits:

Protects employee privacy when submitting anonymous suggestions.

### Configuration:

- Self Service → Suggestions → Status field (Anonymous/Public).
- HR mailbox receives anonymised emails for anonymous suggestions.

**Screenshot:** Showing example email for anonymous suggestions

## **135918 - Remove Remaining 'Follow' Functionality**

### **Overview:**

All remaining references to the 'Follow' functionality have been removed from the system.

### **Benefits:**

- Provides a cleaner and more consistent user interface.
- Eliminates confusion caused by unused or deprecated features.

### **Configuration:**

No configuration required.

### **References removed from:**

- Administration → Company → Settings → Module Templates
- Administration → Company → Settings → Display Settings

System automatically reflects these changes after update.

## Fixes

### **126238 – Carryover Edit Issue**

- Issue resolved where employees could not edit carryover bookings when no carryover days remained.

### **129968 – Workflow Trigger Timing**

- Issue resolved where workflow steps set to trigger on time-off end date were sent a day early.

### **133515 – Anniversary Workflow Due Date**

- Issue resolved where workflows triggered on anniversary dates displayed incorrect due dates for next year.

### **135416 – Wording Change in Company Settings**

- Issue resolved where “Timeoff” wording was changed to “Time off” for consistency.

### **135417 – Wording Change in Display Settings**

- Issue resolved where “Timeoff” wording was changed to “Time off” in display settings.

### **135418 – Wording Change in Module Templates**

- Issue resolved where “Timeoff” wording was changed to “Time off” in module templates.

### **135420 – Wording Change in Workflows**

- Issue resolved where “Timeoff” wording was changed to “Time off” in workflow dropdowns.

### **135427 – Remove Colour Field**

- Issue resolved where the Colour field was removed from Document Classifications screens.

### **135509 – Performance Review Date Sorting**

- Issue resolved where performance review forms were not ordered correctly by date.

### **136132 – Report Builder Training Data**

- Issue resolved where reports using Training data source loaded slowly when Employee fields were included.

**136133 – Role Competencies Display**

- Issue resolved where multiple competency descriptions appeared at once during performance reviews.

**136758 – Timesheet Datatables Error**

- Issue resolved where viewing timesheets caused a datatables error when breaks were ignored.

**136766 – Missing Icons in French Recruitment Portal**

- Issue resolved where upload icons were missing in French-language recruitment portals.

**136779 – Salary Validation in Recruitment**

- Issue resolved where entering salary with commas caused incorrect values during candidate completion.

**136938 – Allowance History Records**

- Issue resolved where allowance history records were created unnecessarily when submitting benefits page.

**137486 – Time Tracking Approval**

- Issue resolved where approver-level users could not approve time tracking records individually or in bulk.

**138103 – HR User Permissions**

- Issue resolved where HR users restricted to “Self Service & Manager” could still view all employee warnings.

**138341 – Expense Report Approver Name**

- Issue resolved where approver names displayed incorrectly in expense item reports.

**138525 – Report Builder Wording Change**

- Issue resolved where “Data source” wording was changed to “Dataset” in Report Builder
