

# Release Notes

Release Date: 04.02.26

Version: 24.17.0

## Enhancements

### 146215 – Performance Improvements: Employee Card

#### Overview

Enhancements have been made to reduce loading times on the Employee Card. This page previously loaded a large amount of information at once, causing slow performance when switching between employee records.

#### Benefits

- Faster page loading
- Smoother navigation between employees
- Reduced backend load
- Improved experience for HR teams reviewing employee records

#### How to Configure

There is nothing you need to set up — these improvements are applied automatically.

#### Behaviour

The Employee Card now loads components more efficiently, improving responsiveness and reducing delays.

## Fixes

### **125428 – Time Off Allowances Reduced Incorrectly**

Issue resolved where daily accrual caused allowances to reduce when an employee leave date was set to today, even though no reduction should occur.

### **144628 – Duplicated Time Off Types Reset 'Time Off Year' to Default**

Issue resolved where duplicating a Time Off Type reset its Time Off Year to System Default instead of retaining the original value.

### **146256 – Clock In Button Misalignment**

Issue resolved where the Clock In button displayed misaligned when certain modules were disabled.

### **146678 – Apostrophes and Line Breaks Display Incorrectly in Time Off Descriptions**

Issue resolved where apostrophes and line breaks displayed with additional characters when editing Time Off Type descriptions.

### **147352 – Negative Allowance Displaying as 0**

Issue resolved where negative time-off allowances on the homepage incorrectly displayed as 0.

### **147552 – Incorrect TOIL Generated for Unauthorised Half-Day Absence**

Issue resolved where TOIL generated excessively when an employee booked unauthorised half-day time off.

### **147617 – Company Mission Statement Videos Cut Off**

Issue resolved where videos added to the Company Mission Statement were partially cut off when additional content was added.

### **148231 – Recruitment Workflow Sending Duplicate Emails**

Issue resolved where declined requisition workflows sent duplicate emails due to duplicated workflow recipients or blank assignments.

### **148929 – Error in Report Builder for Deleted Expense Categories**

Issue resolved where expense reports failed to run when they included records linked to deleted expense categories.

**148942 – Backslashes Displayed Before Special Characters in Social Posts**

Issue resolved where queued Social Recognition posts displayed backslashes before special characters, including in email notifications.
