

Release Notes

Release date: 12.06.2026

Version: 24.22.0

Overview

This release focuses on improving system reliability, data accuracy, and overall user experience across core areas of the HCM platform.

Several enhancements have been introduced to improve usability, navigation, as well as provide better control and visibility for administrators. These updates aim to simplify configuration and ensure smoother day-to-day operations.

In addition, a number of fixes have been implemented to address issues reported by customers. These improvements enhance system stability and resolve data inconsistencies.

Enhancements

Performance Improvements – To-Do List

Overview

Updates have been made to how 'To Do' items are loaded and displayed in the right-hand menu.

Benefits

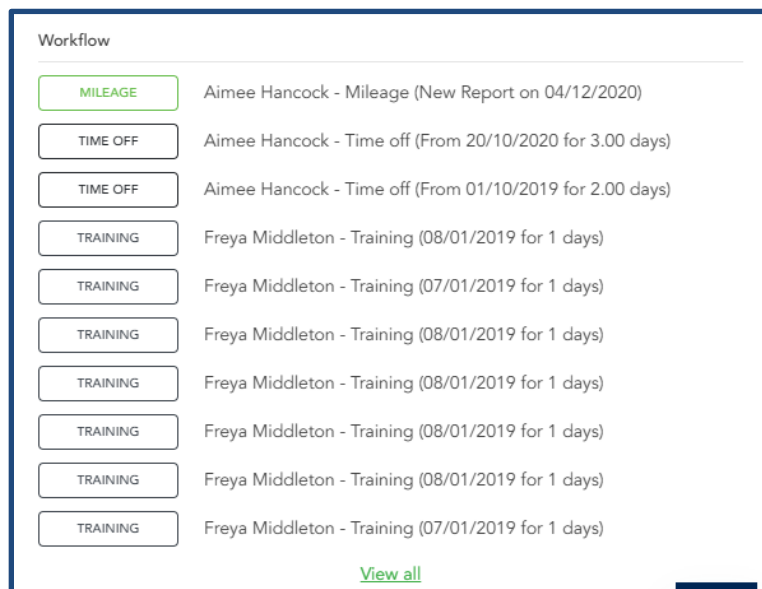

- Significantly decreased load times on every page load, particularly in environments with many To-Do notices.

How to Configure

There is nothing you need to set up — these improvements are applied automatically.

Behaviour

Each section in the To-Do's pane will display a maximum of 10 items. Where there are more than 10 items to show, a 'View all' link provides access to the remaining items from the Workflow View page.

Screenshot : Showing the Workflows section of the To-Do pane – 10 items are shown with a 'View all' link providing access to the remaining items.

Improved Navigation Experience

Overview

Enhancements have been made to the left-hand navigation so that the selected section remains highlighted when users move between pages.

Benefits

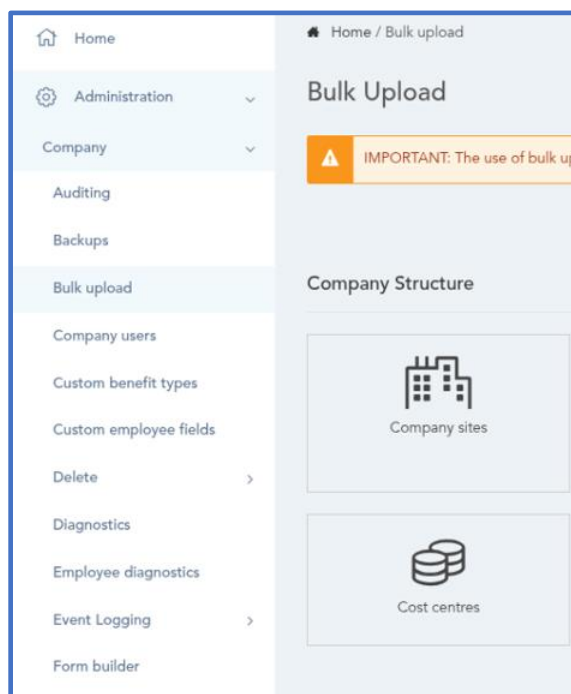

- Easier navigation across the system
- Improved user orientation within modules
- Reduced confusion when switching pages

How to Configure

There is nothing you need to set up — these improvements are applied automatically.

Behaviour

The navigation panel now retains the selected section, helping users clearly understand where they are within the system at all times.

Screenshot : Showing the menu bar – The ‘Administration’, ‘Company’ and ‘Bulk upload’ items are highlighted to indicate the page currently loaded.

Improved Handling of Confidential Information

Overview

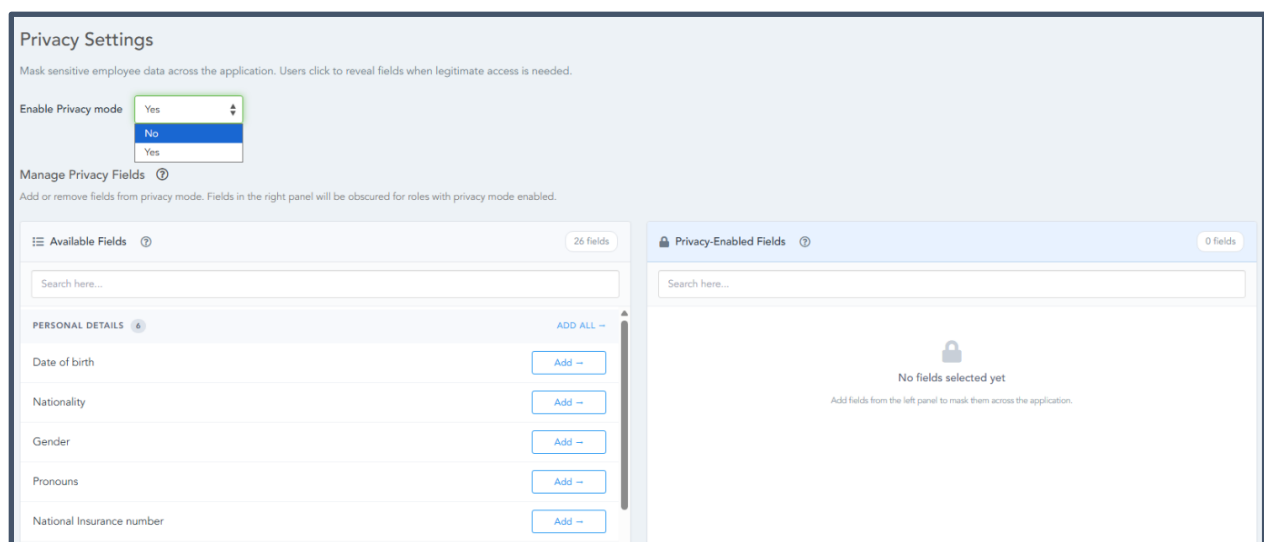

An Administrator can choose to hide sensitive information so that it can only be revealed by default when a user actively chooses to view it.

Benefits

- Increased data protection for confidential information
- Reduced risk of accidental exposure through observation by third parties
- Improved compliance with data privacy expectations

How to Configure

Administrator users can enable this feature and choose which fields to hide by navigating to **Administration > Company > Privacy Settings**.

Screenshot : Showing the Privacy Settings page which allows users to choose which fields to treat as sensitive.

Behaviour

Users will see masked values for sensitive data fields, which can be revealed only when selected.

Privacy mode is active. Some fields are hidden to protect sensitive data.

Starting 01/07/2026

Employee Information

Works ID EMP000197	National insurance Click to reveal	DOB Click to reveal
Start date 01/07/2026	Hours per week 25.00	Work email alison@yopmail.com

Screenshot : Showing the Employee card with the National Insurance number and Date of Birth hidden, and a banner informing the user that some fields are hidden.

Enhancements to Performance Review Forms

Overview

Updates have been made to performance review forms, including improved categorisation and better handling of archived forms.

Benefits

- Easier organisation of performance reviews
- Improved visibility of archived forms
- Better management of review structures

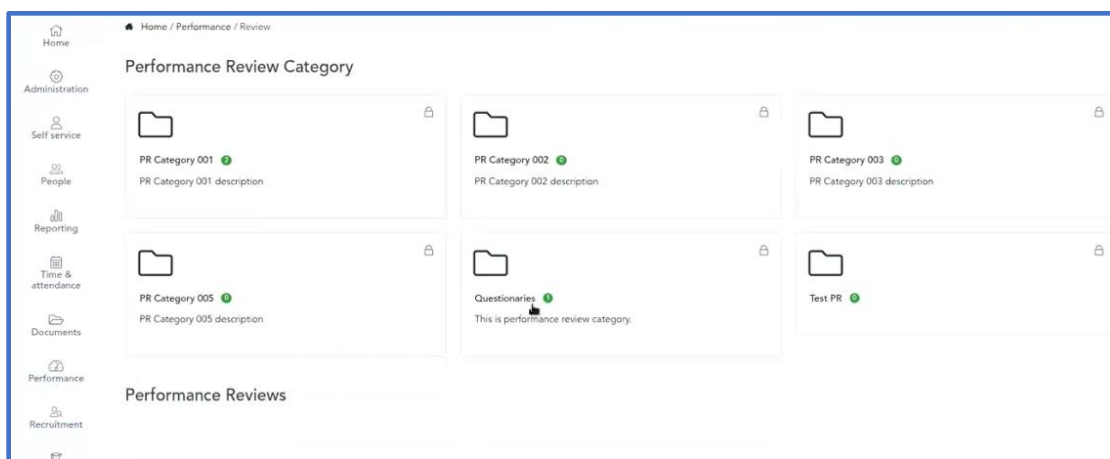

How to Configure

An Administrator or HR User can nominate a Form Category as a Performance Review Category when adding or editing a Category under **Administration > HR > Form Builder > Form Categories**.

An Administrator or HR User can be associate a Performance Form with a Performance Review Category when adding or editing a Form under **Administration > HR > Form Builder**.

Behaviour

Performance review forms now display improved categorisation and clearer visibility rules, including when they are archived.

Screenshot : Showing Performance Review Categories displayed on the Performance Review page.

Fixes

144768 – User Language Not Applied During Creation

Issue resolved where new users created through employee add or quick add received system emails in English regardless of their selected language.

149996 – Report Builder Unable to Open Large Application Data Sources

Issue resolved where application forms with large data sets could not be opened when used as custom data sources in Report Builder.

152344 – Report Permissions Showing Incorrect Employees

Issue resolved where managers could see report data for employees outside their reporting hierarchy, risking unintended access to sensitive information.

152592 – Misaligned Search Dropdown

Issue resolved where search dropdowns became misaligned when scrolling, improving overall usability.

152803 – Comparison Report Ignoring Employee Visibility Settings

Issue resolved where comparison reports did not correctly reflect employee visibility permissions.

153523 – Recruitment Workflow Not Sending Forms

Issue resolved where workflow forms were not sent to recipients during recruitment processes.

153691 – Performance Review Settings Not Updating

Issue resolved where certain performance review configuration settings could not be updated.

153958 – Employees Unable to View Uploaded Documents

Issue resolved where employees could not view uploaded documents unless a document category existed.

154381 – Leaver Access Not Retaining Identity Record

Issue resolved where leaver access changes did not retain the correct identity records.

151296 – Incorrect Warning on Time Off Approval

Issue resolved where users received irrelevant warnings during Time Off approval workflows.

151678 – Time Off Booked Despite Insufficient Allowance

Issue resolved where employees could request Time Off even when allowance was insufficient.

125981 – Finance Users Unable to View Employee Documents

Issue resolved where finance users could not access employee document pages.
