Release Notes

Release date: 09.16.25

Version: 24.6.0

Enhancements

Training Request Questions: Dual Section Support

Training requests now support two distinct question sections: one for employees and one for approvers. This allows for better separation of personal and administrative questions, improving clarity and workflow efficiency.

Benefits:

- Employees can submit personal responses without risk of being overwritten
- Approvers can add logistical details during review
- Admins can manage both sets of questions from a single configuration page

Configuration:

- Administration > HR > Data Management > Questions > Training Request Questions
- You'll see two sections:
- Employee Questions
- Approver Questions
- Configure each section with the relevant questions.
- Tooltips explain who can view/edit each section.
- A dropdown under Approver Questions allows you to control visibility for employees: "Allow Employees to view Approver Questions" → Options: Yes / No (Default: No)

How to use:

- **Employees**
- Fill in Employee Questions when submitting a training request.
- View Approver Questions (if enabled in settings).
- **Managers/Approvers**
- View Employee Questions (read-only).
- Fill in Approver Questions during approval
- **Admins/HR**
- Can view and edit both sections across all pages (View, Edit, Approve).

Where It Appears:

- Self Service → My Development → My Training → Request Training
- Training Course Library → Actions → Request
- Training → Approve • People → Employees → Training → View/Edit
- Training Records → Edit, Approve & View

Additional Notes:

- Clear visual separation between sections
- No impact on existing workflows
- Permissions enforced consistently across all pages

Fixes

Recruitment: Back Button Misrouting

Issue resolved where the back button on the candidate notes page redirected to the general candidate's page instead of the specific candidate card.

Employee Documents: Confusing Deletion Message

Issue resolved where the error message for deleting document categories lacked clarity when conditions weren't met.

Favicon: Missing Post-Login

Issue resolved where the favicon failed to display after login across multiple environments.

Homepage: Activity Counter Too Small Issue resolved where the "Today's Activities" counter did not display correctly when exceeding two digits.

UI: Incorrect Initials in some environments

Issue resolved where "MAA" initials appeared in the top-right corner for some environments.

Time Off: Empty Badge on Declined Requests

Issue resolved where declined time off requests showed an empty badge on hover in the State column.

Employees: Super Approver Self-Assignment

Issue resolved where a Super Approver could be set as their own approver.

Workflows: Scheduled Task Skipping Future Steps

Issue resolved where overnight workflow updates only applied to pending/due steps, ignoring future ones.

API: Employee Status Returns Code

Issue resolved where the API returned employee status codes instead of readable values.

Workflows: Remove Formatting Button Misbehaving

Issue resolved where the "Remove External Formatting" button removed line breaks and duplicated text.

Calendar: Team Filter Not Retained

Issue resolved where selected team filters were not saved on calendar reload.

Branding: Error Message on Save

Issue resolved where saving the branding page showed an error despite successful changes.

Bulk Upload: Yes/No Field in French Canadian

Issue resolved where Yes/No fields displayed incorrectly in French Canadian localisation.

Forms: Unable to Edit Completed Forms

Issue resolved where forms with data could not be edited in the Forms module.

Bulk Upload: Approver Field Defaults to Manager

Issue resolved where blank Approver fields defaulted to Manager during bulk upload.

Reporting: Expense Value Shows as Zero

Issue resolved where saved expenses showed a report value of zero upon submission.

Bulk Upload: Accented Characters Cause Errors

Issue resolved where accented characters in custom employee fields caused bulk upload failures.

Time Off: Overbooking Allowed

Issue resolved where employees could submit time off requests exceeding their allowance.

Reporting: Approver Missing in Expense Items

Issue resolved where approver data was missing in Expense Items reports

Employees: Competencies Grid Not Updating

Issue resolved where changes to employee competencies did not reflect in the grid.

Reporting: Training Dataset Not Visible

Issue resolved where HR, Trainer, and Manager users could not view shared training reports.
