Release Notes

Release Date: 30/10/25
Version: 24.7.0

Enhancements

Custom Training Questions on Report

Overview
- Report Builder now includes Training Request Questions within the Training dataset, allowing users to include responses to both Employee Questions Set and Approver Questions Set in their reports.

Benefits
- Enables reporting on both Employee and Approver training question responses.
- Supports filtering, grouping for more meaningful analysis.
- Ensures full compatibility with all report types (Table, Pivot, Chart, Tile, etc.) while maintaining existing report stability.

How to Configure
- Go to Report Builder → Select Data source → Training Dataset.
- Scroll below the Training Other Dates section.
- You'll find two new sections:
    - Training Request – Employee Questions
    - Training Request – Approver Questions
- Select any active question or answer field to include in your report.
- Use standard Report Builder tools like Filters, Group By, and Aggregates as usual.

Fixes

Workflows: Candidate Deletion Leaves Orphaned Workflows
- Issue resolved where workflows were not deleted when a candidate was removed.

Tickets: Old Logo Appears in Emails
- Issue resolved where an outdated logo was used when no email logo was set.

Recruitment: Interview Confirmation Message Broken
- Issue resolved where the interview confirmation page omitted the interviewer's name due to a broken tag.

Recruitment: Module Templates Not Applied
- Issue resolved where selected module templates were not applied to new employee accounts.

Expenses: Currency Appears Twice in Dropdown
- Issue resolved where selected currency showed twice when using line-level currency selection.

Announcements: Site Restrictions Ignored
- Issue resolved where announcements restricted to one site were visible to users on other sites.

Forms: Apostrophes Display Incorrectly
- Issue resolved where apostrophes in form names appeared as slashes.

Training: Ad Hoc Course Requests Fail
- Issue resolved where employees could not request non-library training courses

Time Off: Accrual Type Lost During Conversion
- Issue resolved where the 'Accrual type' field was reset when converting a candidate to an employee.

Calendar: Employee Names Missing from Events
- Issue resolved where birthday and leaver events did not show employee names.

Social: Recognition Tags Missing on Edit

- Issue resolved where template tags were not available when editing a recognition category.

Social Moderation: Cancel Button Accepts Posts

- Issue resolved where clicking cancel during moderation still accepted or rejected posts.

Training: Empty Course Library Blocks Recipient Selection

- Issue resolved where recipient fields were unavailable when the course library was empty.

Time Off Approval Emails: Missing Auto-Reply Message

- Issue resolved where default time off approval emails lacked the "do not reply" message.

Timesheets: Incorrect TOIL Calculation for Half Days

- Issue resolved where TOIL was calculated from working hours instead of time off duration.

Pay/Benefits: HR Global Restriction Setting Missing

- Issue resolved where HR users lacked a global setting to restrict pay/benefits access.
